DONALD IMHANWA EHIZODE

Creative Web Designer & Developer

pixidimworld (Instagram / Threads) | pixidimworld2d.vercel.app

PROFILE

Creative Web Designer & Developer focused on building interactive websites that help brands communicate, sell, and stand out without feeling static or predictable. I combine UI/UX design, visual direction, front-end development, and creative development to create digital experiences with motion, interaction, storytelling, and strong visual composition. My work ranges from responsive brand websites and product showcases to cinematic, scroll-driven, and 3D web experiences using React, JavaScript, Three.js, WebGL, and GSAP. I also use AI-assisted development as part of my coding workflow to support implementation and iteration, while the creative thinking, visual direction, and final decisions remain my own.

CORE SKILLS

UI / UX & Web Design
UI design • UX and interaction design • Responsive web design • Landing pages • Product showcases • E-commerce interfaces • Visual hierarchy • Canva • Figma

Front-End Development
HTML • CSS • JavaScript • React • Tailwind CSS • Responsive implementation • Basic database integration • Authentication • Booking and form systems

Creative Development
Three.js • WebGL • GSAP • Scroll-driven experiences • Interactive animation • 3D web experiences • Motion-based interfaces • AI-assisted development workflow

3D & Visual Development
Blender • 3D scene planning • Basic modelling • UV mapping • Texture baking • GLB/GLTF workflows • Asset optimisation

Design & Content
Canva • Figma • 2D visual assets • Creative direction • Social media design • Content creation fundamentals • Visual storytelling

Organisation
Microsoft Excel • Stock tracking • Client communication • Digital workflow organisation

EXPERIENCE

Creative Web Designer & Developer — pixidimworld

Freelance / Ongoing

- Design and develop interactive websites, landing pages, product experiences, and digital brand experiences for clients and personal creative projects.
- Create websites that go beyond static layouts by using motion, interaction, scroll behaviour, 3D elements, and visual storytelling to make digital experiences feel more alive.
- Handle projects from early visual direction and interface concepts through front-end development and responsive implementation.
- Create UI concepts and visual direction using Canva and Figma, then translate those concepts into functional websites.
- Build responsive front-end experiences using HTML, CSS, JavaScript, and React.
- Develop interactive experiences using Three.js, WebGL, and GSAP, and use Blender to plan 3D environments and prepare visual assets for the web.
- Work directly with clients to understand brand goals and translate them into distinctive digital experiences.

Fintech App — Research, UI/UX & Product Development Project

- Participated in the research and development of a fintech application concept.
- Translated research findings into a structured digital product experience, including interface structure and user flows.
- Explored how users would navigate key areas of the fintech product and interact with its features.

Social Media Content & Growth — Self-Directed Intern

Ongoing

- Develop practical skills in social media content creation, audience growth, and digital positioning through self-directed learning and experimentation.
- Create and test short-form content around web design, creative development, and digital projects.
- Analyse content performance to understand which hooks, formats, captions, and calls-to-action generate stronger reach and engagement.

Sales Representative — Jamini Systems

Warri, Nigeria

- Assisted customers with DStv subscription activation and renewal services.
- Collected customer account and IUC details, processed subscription requests through the company system, and confirmed service after payment.
- Explained available subscription options, responded to basic customer questions, and supported day-to-day sales and client communication.

Inventory Manager — Bubble Tea Shop

- Managed stock records for ingredients, supplies, and materials used in daily operations.
- Used Microsoft Excel to track stock entering and leaving inventory and monitored consumption levels.
- Identified low-stock items, reported purchasing needs to the department head, and supported advance planning for supplies imported from China.
- Tracked stock movement between inventory and the kitchen to improve accountability and maintain availability of essential materials.

Intern — KSPCA

Nairobi, Kenya

- Supported daily care and handling of dogs and other animals, including feeding, walking, monitoring, and basic record keeping.
- Learned safe approaches for interacting with dogs with different temperaments, including nervous, energetic, and aggressive dogs under supervision.
- Developed practical understanding of animal behaviour, safe handling, and methods for calming stressed animals.

EDUCATION

University of Kigali — B.A./B.Sc. Coursework

2023–2026
